

Millennium Infotech Inc.

Capabilities Overview

- **Security and Firewall Solutions.**
- **Server Virtualization**
- **Application Virtualization and Streaming**
- **Disaster Recovery and Business Continuity Solutions**
- **Storage & SAN Management**
- **Storage Consolidation & Virtualization**
- **NextGen Disk-to-Disk (D2D) Backup Solutions using**
- **De-Duplication technologies.**
- **Remote Office Backups**
- **Replication & Off-Site Storage**
- **Snapshot Technology**
- **Email & Instant Messaging**
- **High Availability Clustering**
- **WAN Acceleration (Proven solution that deliver upto 100X acceleration using WDS)**
- **Branch Office Consolidation**
- **Data Security**
- **Content Management**

Commitment"**

Content Management

Customer Challenge

Are you planning, designing, discussing, escalating, etc and there's almost near constant communication. But the problem here is that most of this communication is done via e-mail or other traditional methods of collaboration such as fax or conference calls. These are inefficient methods of collaboration.

MITI Value Proposition

The **Content management** provides a secure, unified environment for creating, managing, delivering and archiving any type of unstructured information. Policy-driven automation enables you to author, review, approve, and publish any piece of content in accordance with business rules.

Partners Our Service

	Solution Centric Approach
The logo for EMC² documentum Partner features the text "EMC²" in a blue, sans-serif font, followed by a vertical line, then "documentum" in a larger, bold, black, sans-serif font, and "Partner" in a smaller, black, sans-serif font below it.	<ul style="list-style-type: none">• Programme & Project Management• Solution Architecture Infrastructure• Planning and Design• Requirement Definition & solution design• Legacy Content Migration Services• System Migration Services• SOA Consulting and Implementation

Virtualization

Customer Challenge

Do you feel constant pressure to reduce server sprawl and the associated costs while still meeting your company's growing business needs? Over 32 % customers are using virtualization technology to achieve both goals. By consolidating servers, Customers have managed to cut IT costs by 50% and increase utilization, productivity and efficiency.

MITI Value Proposition

Of course, having 1/10th the number of physical servers will reduce your hardware and labor costs. You will also save associated power, cooling and space costs but we enhance you ROI through our expert certified professionals in leveraging by Dramatically cutting costs, Reducing Deployment time.

Partners Our Service

	Strategy Development and Direction
	<ul style="list-style-type: none">• Programme & Project Management• Solution Architecture Infrastructure• Planning and Design• Requirement Definition & Solution Design• System Configuration, Development and Implementation• Systems Integration• Project QA & "in-project" Staff Mentoring• Programmes SOA Consulting and Implementation

Data Security Management

Customer Challenge

Network is your computer. Assuring network uptime is the most critical job function of any IT department. Whether it is your layer-2 or layer-3, your VPNs or your perimeter networks or your voice networks each one needs attention in assuring your overall network functionality. How do you ensure your network meets the demands it is designed for.

MITI value Proposition

Let our Certified networking professionals build, design and manage your networks. Engage our audit services to figure out if your networking is really meeting the demands it was designed for and whether it is secure.

Partners Our Service

	Network design and deployment	
		<ul style="list-style-type: none">• Perimeter security solutions, policy establishment• Intrusion detection and prevention• VPN deployment• Network load balancing• End-to-end network monitoring and management• Network/security audits

Data Storage Management

Customer Challenge

Storage is growing at the rate of 75% in any enterprise. Storage networks in the form of SAN (Storage Area Networks), NAS (Network Attached Storage), archival storage (CAS) is already part of most of the IT enterprises. Backups are key data protection and availability mechanism in many client places. How the growing storage needs and management requirements will effect the enterprise in future.

MITI value Proposition

Our experience in designing storage networks in excess of 150 TB and backup architecture of over 1 peta byte can definitely help in getting a handle on your storage. Whether you are considering emerging CDP standard or distributed data networks, we will make a measurable difference.

Partners Our Service

		Storage network design (SAN or NAS)
		<ul style="list-style-type: none"> • Storage consolidation –file server or block storage • Distributed storage n/w implementation • Storage virtualization • Design of BuRA(Backup, Recovery and Archival) • Disaster recovery and business continuity planning • Distributed storage networks management
		
		
		

Network Management

Customer Challenge

Given the importance of anytime, anywhere application access, IT departments are turning to wide-area data services to improve and accelerate application performance across the wide-area network (WAN). Using WDS, IT can provide LAN-like access to data and applications anywhere throughout the enterprise network, enabling real-time collaboration for users in branch offices and mobile workers all over the world.

MITI value Proposition

MITI provides a new generation of Application Delivery Solutions which are designed to enable organizations to be able to centralize servers and still ensure optimum application performance.

Partners Our Service

		We can help accelerate operations by
 Think fast™	 a Blue Coat company	<ul style="list-style-type: none"> • reducing the time to complete repetitive operations. • Tap global markets, with less cost. • A key objective for many companies today is to reach out beyond their existing markets. • Enable outsourcing and distributed collaboration. • Provide infrastructure for an agile business. • Secure critical company and customer data
		
		

Company Facts

Millennium Infotech (MITI), is a global value-added services provider that offers end- to-end technology driven solutions for a dynamic business environment.

Millennium Infotech (MITI), which began as a small organization, grew to establish a strong presence in the USA. The company, only software developer initially, gradually grew into a full fledged System Integrator and Data Center Solution Provider within a span of 2 years. Now, after a decade, MITI is proud to have become one of the leading IT firms in the industry.

We involve ourselves proactively to provide solutions to re-engineer your businesses that result in business process optimization, overall cost reduction and provide the benefit of maximizing your ROI (return on investment) on IT solutions. With offices in US, Middle East, Far East, Europe and India, **Millennium Infotech** is serving clients across the globe. This winning combination of integrity, long-term thinking, and contribution, **Millennium Infotech** will continue to build on our prior successes with your support.
