

As only a true security expert can, McAfee protects what the world values—from personal photos and music to the confidential records of global enterprises.

These days, the threats are tougher, and the perpetrators are trickier. But the true innovators always have an answer.

As it has for more than 20 years, McAfee continues to deliver the superior protection trusted by millions of people worldwide.

McAfee is the largest dedicated security company in the world.

Malware on the rise

The threats to security are varied and dynamic, but our experience and innovation keeps our customers a step ahead of trouble.

Threat prevention

Our integrated security solutions quickly identify and resolve IT vulnerabilities. Today's threats. Tomorrow's attacks. We stop malware cold, no matter where it comes from or how it tries to get in.

Compliance

McAfee offers a better way to demonstrate internal policies and report to industry regulators. It's the smart way to avoid violations and pass an audit.

Online safety

McAfee technology gives Internet users the freedom to search safe and surf safe. It's a perfect complement to McAfee threat prevention solutions—at home and at work.

McAfee® ePolicy Orchestrator® (ePO™), the centralized management console offered only by McAfee, provides a single view of multiple security products for every facet of a smart security risk management system.

Integrated security risk management solutions. The expert edge.

Better protection for every market.

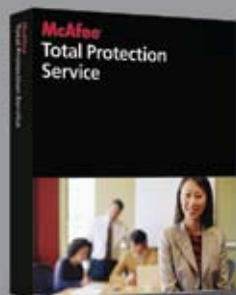

Home and Home Offices

McAfee secures home and home-office computers with a proven combination of ease, effectiveness, and comprehensive protection. Always on. Always updated. It's the easy way to get advanced protection against identity theft, phishing scams, spyware, and other malicious threats.

Medium Business

Marshal a powerful security defense against complex and evolving threats while balancing costs, resources, time, and personnel. It's smart, simple, and secure protection for desktops, servers, and the network.

Small Business

Gain the confidence of full-time security expertise without the time and costs associated with expensive systems or hiring an IT staff. McAfee protects small businesses from virus outbreaks, spyware and adware, spam, unauthorized desktop access, intrusion attempts, and more.

Large Enterprise

Large businesses trust our strategic and pragmatic approach to security. Our security risk management methodology includes everything from policy creation and protection strategies to best practices for compliance reviews—all to help our customers maintain an optimum level of security and smooth, efficient operations.

When you're in a highly regulated business, control over network security threats is a must. There's just too much at stake. Revenue. Reputation. Nothing less than the ultimate solution will do.

McAfee products work together to create a comprehensive security risk management solution. Integrated. Automated. Actionable.

Every area of risk is complex. So proper control in real time is critical. Otherwise, risk management can quickly overwhelm even the strongest IT resources.

Thanks to McAfee ePolicy Orchestrator, one management console integrates everything—even third-party products. Now you'll enjoy true control. It's just what you'd expect from the industry leader.

Protection that spans everything from devices to the data center.

Today's attacks exploit weaknesses in networks and systems to gain a foothold in your business. From servers and routers to cell phones and PDAs, every IT device is a potential target and entry point for malware.

McAfee provides a smart arsenal that includes anti-spam, anti-spyware, anti-virus, data loss prevention, encryption, host intrusion prevention, mobile security, plus messaging and email security.

When it comes to managing risk, our solutions cover it all—automated remediation, policy audit, network access control, risk and compliance analysis, system security management, and vulnerability management.
